

HARDSCAPES

LASTING IMPACT, TIMELESS BEAUTY

From timeless clay pavers to resilient pathway aggregates, Endicott's hardscape materials bring enduring strength and natural beauty to every outdoor space.

WHERE FORM MEETS FUNCTION.

NOTHING EXEMPLIFIES THE IDEA OF “WHERE FORM MEETS FUNCTION” BETTER THAN OUR CLAY PAVERS AND PATHWAY AGGREGATE. AS DURABLE AS THEY ARE STUNNING, ENDICOTT CLAY PAVERS ARE FORMED FROM NATURAL, COLORFAST MATERIALS TO RESIST WEAR, COLOR-FADING AND STAINING. AND OUR PATHWAY AGGREGATE IS THE PERFECT CHOICE TO ENHANCE PEDESTRIAN TRAFFIC AREAS WITH A NATURAL APPEARANCE.

INVISI-LUG®

AN INNOVATIVE CLAY PAVER THAT DOES IT ALL

THE NEW INVISI-LUG® EXTRUDED CLAY PAVER GIVES YOU EVERYTHING YOU HAVE WANTED IN A PAVER:

- A recessed lug that guarantees proper joint spacing to eliminate chippage
- Because its lugs are recessed, it leaves a crisp, square edge
- Eliminates the need for buying plastic spacers, saving substantial cost
- Since proper joint spacing is automatic, the speed of installation is improved
- Improved joint line appearance
- Full and proper joint spacing on sand-set pavers promotes interlock

INVISI-LUG® STRENGTHS IN ADDITION TO THE BENEFITS OF TRADITIONAL CLAY PAVERS:

- Vibrant colors, including ironspots, that other materials cannot mimic
- Colorfast
- Durable
- Incredibly high compressive strength

The superior joint line and vibrant colors help make your unique hardscape vision a reality.

PATHWAY AGGREGATE COLORS

SPECTRUM OF COLORS TO ENHANCE ANY DESIGN

Endicott Pathway Aggregate offers a stunning spectrum of colors to enhance any landscape design. From the bold elegance of Midnight to the earthy warmth of Butternut to the subtle elegance of Dove Gray, each hue brings unique character and charm to your pathways and outdoor spaces. Whether you seek to create a modern oasis, a tranquil retreat or a vibrant focal point, Endicott has the perfect aggregate color to complement your vision alternatives.

Burning Sky

Coral Red

Dove Gray

Butternut

FEATURES & BENEFITS

TRANSFORM YOUR OUTDOOR PEDESTRIAN TRAFFIC AREAS WITH RECYCLED BRICK AGGREGATE

Endicott Stabilized Pathway Brick Aggregate is the perfect choice for pedestrian traffic areas that need an impressive natural appearance and long-lasting durability. Our stabilized pathway mix is made from recycled Endicott brick and an organic stabilizing binder from Organic-Lock™. Recycled brick and the organic binder make our pathway material a sustainable eco-friendly choice. Additionally, recycled brick pathways are a more affordable alternative to decomposed granite, concrete, asphalt or other hardscape alternatives.

ENGINEERED TO OUTPERFORM AND OUTLAST THE ALTERNATIVES

Endicott Stabilized Brick Aggregate is screened through a carefully controlled grinding system for precise sieve distribution. Having the proper mix of particle sizing promotes permeability while also allowing for necessary compaction. The Organic-Lock™ binder absorbs excess water through swelling and then gradually releases the water through evaporation into the atmosphere as well as through the base course into the groundwater.

IDEAL FOR HARDSCAPES AT:

- Corporate Campuses
- Parks
- Nature Paths
- Municipal Gardens
- Public Spaces

KEY BENEFITS:

- Made from eco-friendly, sustainable material
- Stunning spectrum of colors
- Affordable option to other aggregate materials
- Permeability assists with water management

Organic-Lock™ is a patented binding agent made from a renewable plant resource and proprietary additives. It's designed to be blended with crushed aggregate to create natural looking surfaces, while locking the aggregate in place to minimize erosion.
